[Home](#) > East County Bus Operations and Maintenance Facility Opens

Wednesday, October 12, 2016

Image not found or type unknown

The East County Bus Operations & Maintenance Facility is located in El Cajon and will help the region continue to reduce air pollution by expanding our ability to operate buses using Compressed Natural Gas (CNG). A new CNG fueling station on site will allow us to phase out the existing diesel-fueled buses and replace them with CNG-fueled buses.

CNG-fueled buses provide:

- A 53% reduction in NOx emissions
- An 85% decrease in particulate matter pollution
- An 89% decrease in CO emissions

The facility sits on 5.5 acres and serves more than 4 million passengers per year in East County's urbanized area along Interstate 8 corridor, as well as rural, unincorporated areas in the county. It consists of fueling stations, maintenance and administration buildings, a bus wash, and parking for buses and staff.

About the Project

Location: 544 Vernon Way, El Cajon, California

Building Size:

34,500-square-foot high-bay maintenance building

10,275-square-foot second floor administrative space

Lot Size: 5.5 acres

Construction Cost: \$26.2 million

Lead Contractor: Clark Construction

Bus Operations and Maintenance Activities: Transdev North America

Bus Count: 120 (at full capacity)

Maintenance Service Bays: 8

Bus Operators: 115

Bus Mechanics: 14

Administrative staff: 17

FY 2016 Ridership: 4,157,102

LEED Status: Silver Certification (pending)
