Right of Entry Permit Tracking

Industry Safe allows internal MTS stakeholders to view Right of Entry Permits - both executed and others that are still in the approval process. This web based application can help your department monitor and/or seek information about work around MTS's right of way.

Examples of information available: location of third party projects in relation to trolley or railroad line, downloadable project plans, Permittee contact information, permit's expiration date

> https://www.industrysafe.com

> **Username:** mtsrow@sdmts.com

> **Password:** MTStest123

For more information or questions, contact Joann Delgado or Monica Coria
